EXP NO 10(a)

Internetworking with Routers in Cisco Packet Tracer

Aim

To design and configure a simple internetwork using a router and two PC's

PROCEDURE

1) Add on router and two PC's in Cisco Packet Tracer

2) Connect PC0 to Router1 Fast Ethernet 0/0 and PC1 to Fast Ethernet 0/1 using copper straight through cables

3) Configure the router using CLI commands

IP address configuration

Device	IP Address	Default Gateway
PC0	192.168.10.2	192.168.10.1
PC1	192.178.10.1	192.178.10.2

Subnet mask for both PCs : 255.255.255.0

Testing

Use Add Simple PDU to send a packet from PC0 to PC1 and verify successful communication.

RESULT:

Thus, a simple internetwork was configured successfully using a router and two PCs and internet cloud.

EXP NO: 10(b)

Internetworking using wireless Router, DHCP server

AIM

To design and configure a network using a wireless router, DHCP server, laptop, PC and virtual cloud.

PROCEDURE

1. Add a wireless router, PC, laptop, cable modem
2. Connect the devices using suitable cables.
3. Set the wireless router SSID to Home Network and enable DHCP
4. Configure the laptop's wireless module and connect it to Home Network
5. Set the PC to obtain an IP address automatically and save it
6. Configure the server's DHCP service with gateway 208.67.220.220, DNS 208.67.220.220 and starting
7. Enable DNS server and create an A record for Cisco.com pointing to 208.67.220.220 with subnet mask 255.255.255.0
8. Configure the server IP as 208.67.220.220 with subnet
9. Verify connectivity using ip config / renew and ping Cisco.com.

RESULT

DHCP

RESULT:

Thus a network using a wireless router, DHCP server and Internet cloud was configured in Cisco Packet.
