EXP NO: 5

PACKET CAPTURE AND ANALYSIS USING WIRESHARK

AIM

To capture and analysis network packets using the wireshark packet capture tool

THEORY

Wireshark is a network protocal analyzer used to capture, filter and inspect network packets. It displays packet details, protocal information, and packet bytes. It can analyze protocals such as TCP, UDP, ARP and DHCP.

FILTERS USED

- TCP/UDP -> tcp/udp
- ARP -> arp
- DNS -> dns
- HTTP -> Http
- ICMP -> icmp
- DHCP -> dhcp

PROCEDURE :

1) Create a Filter to display only TCP/UDP packets, inspect and provide the flow graph

2) Create a Filter to display only ARP packets and inspect the packets

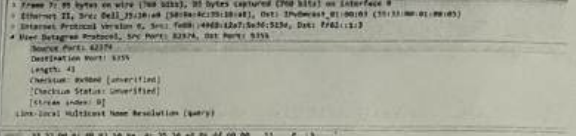

3) Create a Filter to display only DNS packets and provide the follow graph Procedure

4) Create a Filter to display only HTTP packets and inspects the packets

5) Create a Filter to display only IP/ICMP packets and inspect the packets.

6) Create a Filter to display only DHCP packets and inspect the packets

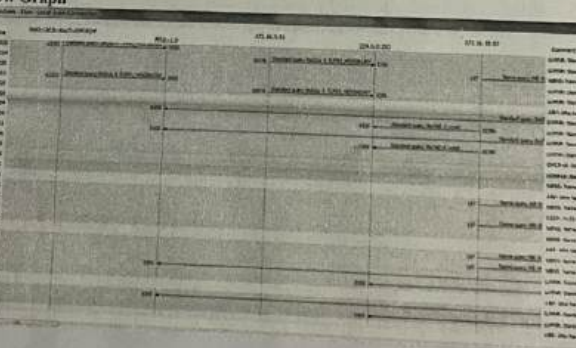

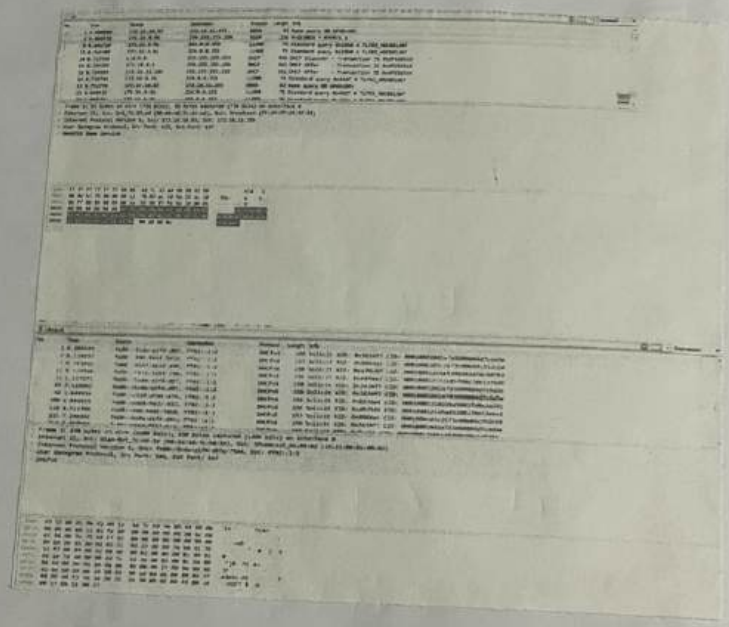

Flow Graph

RESULT:

Hence successfully captured and analysed network packet using the wireshark packet capture tool
